SUBJECT: VIEWING OF POD VIDEOS

On 30 January 12, at approximately 1830 hours, reporting intern Theresa Galdek viewed pod 602 (located at [REDACTED])

This was a rotating pod which surveyed a four way intersection between [REDACTED]. There was slow but steady traffic that was passing through, but there were no indications that police activity was present in the area that was under surveillance. The location and time of the incident under investigation fails to canvas the allegation that has taken place.
